POLYTECH activity

Guest speaker

Polytech specializing in the field of educational products and services of all levels, accepted the invitation of the Deputy Chairman of the Department of Special Education of University of Thessaly to attend as a speaker at a special meeting of the Department held in Nafplio on Saturday 07/03/2014. The purpose of Polytech’s presence was the emergence of specialized workshops for children with special needs who enjoy wide acceptance in the Commonwealth of Russia, and the desire of the company to further cooperate with the Department of Special Education aiming at promoting and processing products and workshops, ideal for teaching natural sciences to people with special needs .

Specialized scientists who attended this meeting had the opportunity to present their positions and work in the field of teaching physical science to people with special needs. The presence of the representatives of Polytech gave rise to debates on creation and processing products capable of facilitating people of this group in the teaching and learning of science.

The conclusion was that people with special needs can be given the opportunity to enhance their knowledge of science by means of appropriate techniques and equipment. Polytech’s sensitivity in the area of teaching people with learning disabilities, has led to the development of years special equipment such as sensors and simulators, followed by experiments, easy to perform by individuals with disabilities in the field of Physics, Chemistry, Biology.
