POLYTECH activity

Event Creator

Polytech SA organized an event, in its installation, in order to exhibit and display products related to the learning of Science in Secondary Education. The invitees were the Administrative committee of Secondary Education, school boards, the EKFE, Middle and High schools principals and Science professors (Physics, Chemistry and Biology).

The event included a guided tour of the company installations, presentation of its modern laboratories on learning Science, performance of various experiments, presentation of the integrated software that accompanies its modern laboratories in Science Education, etc.

Polytech SA would like to thank everyone for their presence in the event and assure them that the company will be at their disposal for their general or specific needs in the task of advancing and achieving educational goals.
