#### POLYTECH activity

Laboratory Demonstration

## Polytech 's cooperation with the Department of Special Education of University of Thessaly.

### Volos 31.5.2014

POLYTECH announced the completion of the joint cooperation for the academic year 2013-2014 with the Department of Special Education of University of Thessaly in the use of the mobile laboratory PCB 301 by the students of the 6th Gymnasium of Volos.

POLYTECH would like to thank the President Professor of Special Education Department Mr. Dionysios Vavougios for his support on this project and his commitment to future joint projects in the coming school years.

Polytech accepted the proposal of the Special Education Department of the University of Thessaly to contribute to the creation of a laboratory within the University which will include its mobile laboratory PCB 301. This enables future teachers of secondary education and high school students to exploit the potential use of the PCB 301 laboratory.

During the project many groups of students majoring in the field of Education and the Department of Electrical and Computer Engineering along with students of the 6th Gymnasium of Volos had the chance to use and evaluate the potential of this laboratory, and deepen their knowledge in Natural Sciences at the experimental level. (Physics, Biology, Chemistry).
