Polytech's product presentation in M.N Raptou private school.

Λάρισα 05.11.2015

On 5/11/2015 Polytech presented its products including the mobile Science Laboratory PCB301, newly released ACADEMUS CRS software and preschool application CARETTA at the teachers and staff of M.N Raptou private school in city of Larissa Larissa

POLYTECH, after the invitation from the "Schools Mary N. Raptou", presented the following products: PCB301 (a complete interactive learning system which allows direct participation of students in the teaching of Physics, Chemistry and Biology by producing a wide range of experiments together with an integrated software), the ACADEMUS CRS software (which allows the teacher to monitor student performance through interactive quizzes and assessment tests and having the ability to store and manage the results through a database which is created for the class) and the new product of the company CARETTA (which is a pre-teaching platform with integrated kindergarten curriculum with the help of a turtle robot transforms knowledge into play). During the event 80 staff and teachers had a chance to get information and ask questions regarding the company and the educational products and solutions it produces.

POLYTECH would like to thank the Mary N.Raptou private schools for the invitation as well as for the cordial and hospitable reception and would like to reciprocate the hospitality by inviting teachers and their students in its facilities in order further explain how POLYTECH's solutions can enhance education of Sciences.
