Laboratory installation and training

Albanian Vocational Training Schools 2017

Albania, 27.11.2017

**CUSTOMER:**

Ministry of Social Welfare
and Youth - Albania

**SCHOOL:**

ALI MYFTIU, ELBASAN
VOCATIONAL TRAINING SCHOOL

POLYTECH implemented a large scale project for "Supply of laboratory equipment for Vocational Education and Training schools" and provided 15 Vocational Education Schools with various laboratory equipment, trainers and simulators. The equipment were installed in schools in the territory of Tirana, Skodra, Elbasan, Berat, Korce, Durres, Fieri and Kamez.

Specifically in the city of Elbasan, at the *Ali Myftiu Vocational Training High School*, the equipment that was installed is the below:

INSTALLED EQUIPMENT**ELECTROPNEUMATICS TRAINER -****PTS-3840 EPS**

PTS 3840 Electro-pneumatics trainer is a compact desk-top trainer, ideal for building, operating and controlling circuits that include electro-pneumatics, sensors, actuators, electronics and process control components and controllers.

**AUTOTRONICS TRAINER - FP 300**

The tabletop Autotronics FP300 T simulator, connected to the PC, guides the user (via FP300 VS software), step-by-step in using the simulation in order to practice in all Automotive Electrical circuits and to perform virtual and real measurements simultaneously.

**CAN BUS FP311 SIMULATOR**

FP311 is the simulation unit of the FP300 series which introduces the students to the basics of the CAN-BUS architecture signal and measurement process in modern Autotronics.

We would like to thank the Albanian Government for selecting our equipment for the update of the Vocational Training Centers and our partners "Power Industries Ltd " in Tirana for their cooperation.
