- IMPORT / EXPORT facility for Data Entry

POLYTECH is pleased to present the **new updated version** of Power Scoring System "LEONIDAS".

Leonidas power scoring system is a "State of the Art" computer system to automate TKD (Tae Kwon Do) class or tournament on Power hit competition. This system is an integrated Athlete Participation and Target Scoring management system. With the new version the athlete has the ability to measure the strength of the kick while performing a wider range of exercises.

LEONIDAS architecture is based on the iDAS Server and remote Targets, all interconnected by a wireless network and all sharing the same database.

The Target Scoring system comprises of both system hardware and software and works with MS Windows in a Target network configuration or Android in Target Stand Alone configuration.

The Athlete (Class and Tournament) management system comprises of a software running on MS Windows.
