## Visiting the Private School M.N. Raptou

Larisa, 05.11.2015

## Date

5/11/2015

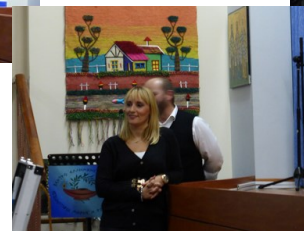

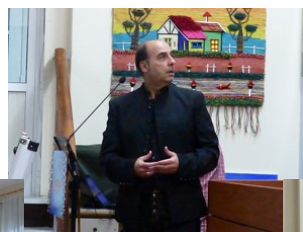

## Location

Private schools M.N.  
Raptou, Larisa

On November 5<sup>th</sup>, 2015 Polytech presented its products **PCB301**, **ACADEMUS CRS** and **CARETTA** in the "Private Schools M.N. Raptou" in the city of Larisa.

POLYTECH, after an invitation from the "Private Schools Mary N. Raptou", attended on the premises of the school and in the presence of 80 teachers, informed and presented the following products: **PCB301** which is a complete interactive learning system which allows direct participation of students in the teaching of Physics, Chemistry and Biology by producing a wide range of experiments along with an integrated software, **ACADEMUS CRS** software which allows the teacher to monitor the student's performance through interactive quizzes and assessment tests and having the ability to store and manage the results through a database which is created for the class and the new product of the company **CARETTA** which is a pre-teaching platform with integrated kindergarten curriculum and, with the help of a turtle robot, transforms knowledge into play.

POLYTECH would like to thank the "Private schools Mary N. Raptou" for the invitation as well as for the cordial and hospitable reception and would like to reciprocate the hospitality by inviting teachers with their students at its facilities in order to show the new way of science teaching that the company promotes.
